2. Academic degrees

Year: 1986

Degree: DOUTORAMENTO

Final grade: Aprovado com Distinção e Louvor

Degree granting institution Universidade Técnica de Lisboa

School/College/Campus Instituto Superior Técnico

Thesis title Fadiga de Aços-Carbono (Fatigue of Carbon Steels)

Supervisor: Carlos A. G. de Moura Branco

Co-supervisor: -----

Scientific area Mecânica da Fractura

Program title Doutoramento em Engenharia Mecânica

Year: 2004

Degree: AGREGAÇÃO

Final grade: Aprovado

Degree granting institution Universidade Técnica de Lisboa

School/College/Campus Instituto Superior Técnico

Thesis title Caracterização da resistência mecânica de multifilamentos contínuos usados em compósitos cerâmicos e carbono-carbono

Scientific area Engenharia de Materiais

Program title Agregação em Engenharia de Materiais

Year: 1977

Degree: LICENCIATURA

Final grade: Média de 17 valores (17 over 20).

Degree granting institution Universidade Técnica de Lisboa

School/College/Campus Instituto Superior Técnico

Scientific area Engenharia Metalúrgica

Number of curricular years 5

Program title Licenciatura em Engenharia Metalúrgica

3. Previous activity and current status

Período	Cargo, categoria ou actividade	Instituição
04-2-2004 a	Associate Professor (with Aggregation)	Instituto Superior Técnico
01-3-1986 a 28-2-1988	Assistant Professor at the Department of Mechanical Engineering	Instituto Superior Técnico
01-12-1993 a 30-11-1995	Director of Materials Department	INETI - National Institute of Industrial Engineering and Technology
01-7-1998 a 01-7-2000	Head of Materials Engineering Department	Instituto Superior Técnico
01-7-2002 a 01-7-2007	Coordinator of UME (Structural Materials Unit)	ICEMS - Institute of Materials and Surfaces Science and Engineering (Lisbon)
01-7-2004 a 01-7-2008	Head of Materials Engineering Department	Instituto Superior Técnico

4. Area of scientific activity

L. Guerra Rosa started his research and teaching career at the Instituto Superior Técnico in 1977, after his graduation in metallurgical engineering. In 1986, Rosa obtained the Ph.D. degree in mechanical engineering with a thesis on fatigue crack nucleation and propagation in steels, using fracture-mechanics concepts. In 1988, he created his own research group, changed slightly his research topics, and focused on ceramics and composite materials, including petrous materials, their characterization, and processing. Since then and taking advantage of his earlier experience, Rosa has been devoting his time to problems involving structural and technological characterization of materials at different stages of their elaboration, to understand their behavior, to compare their properties to references and specifications, and to evaluate their performances in condition simulating applications.

- in Sotis: <https://sotis.tecnico.ulisboa.pt/researcher/ist11630>

During the last 10 years, he has been quite active in two major research lines:

- 1) MATERIALS PROCESSING USING SOLAR FURNACES
- 2) ORNAMENTAL AND ENGINEERED STONES (CHARACTERIZATION AND PROCESSING)

The links and joint projects with foreign groups reached a very good level of collaboration, with publications and research contracts showing the degree of interdisciplinarity.

5. Present research interest

Domain of specialization

Present research topics cover:

- Extending horizon of materials processing with solar energy*
- Ornamental stones (natural ceramics) and engineered stones*
- Structural and technological characterization of technical ceramics and ceramic matrix composites. Research to support the development of standards for characterization methods for ceramic (SiC, Al₂O₃) and carbon fibres used to reinforce ceramic matrix and carbon-carbon composites.*

In the past, the research work of L. Guerra Rosa has also included:

- fracture & fatigue of structural steels and aluminium alloys;
- multilaminar composites made of thin sheets of mild steel bonded by a metallic matrix (zinc or lead/tin) or by a polymeric adhesive. These new materials show increased impact and fatigue resistance when compared with monolithic steel plate, and are especially suitable for high impact resistance applications.

Current research interests

* Materials processing using solar furnaces: high-temperature processes; tests using different heating and cooling cycles; comparison between solar-sintered ceramic bodies and those produced in conventional furnaces; carbide synthesis of d-group transition metals and kinetic aspects of reaction under the solar spectral radiation. User of Plataforma Solar de Almería-CIEMAT (Spain) and PROMES-CNRS (France). Member of STAGE-STE ("Scientific and Technological Alliance for Guaranteeing the European Excellence in Concentrating Solar Thermal Energy") <http://www.stage-ste.eu>

* Ornamental and engineered stones; rock fracture mechanics and stone cutting technologies. Microstructure and mechanical properties, dynamic test methodologies for assessing the elastic constants; characterisation of new diamond tools; and study of new processing technologies, including polishing. Member of OSNET and partner in several research projects.

Other professional interests/activities

* Research to support the development of standards for characterization methods for ceramic (SiC, Al₂O₃) and carbon fibres used to reinforce ceramic matrix and carbon-carbon composites. Validation of mechanical test procedures and assessment of factors that affect the measurements, namely of tensile test methods for characterising reinforcements (multifilament tows consisting of small-diameter SiC, Al₂O₃ and carbon fibres) and test methods to determine the fiber/matrix interfacial frictional shear stress (using minicomposites); evaluation of damage in composites through cyclic tensile tests. Development of statistical models for the distribution of strength data. Member of CEN / TC 184 / SC 1 "Advanced technical ceramics - Ceramics composites" experts group, since 1998.

6. Experience as scientific adviser

- Supervisor of 4 concluded Doctor's Theses:

D1) "A Study on Mechanical Behaviour of Three Polymer Matrix Composites Incorporating Petreous Components", presented by João Pedro Lam dos Santos (approved in July 1, 2013), UTL/IST.

D2) "Stone Materials and Cladding Fixing Systems – A Physical-Mechanical Behaviour Study", presented by Vera Lúcia Cordeiro Pires (approved in April 8, 2013), UTL/IST.

D3) "Caracterização da resistência à fractura e fadiga de materiais cerâmicos estruturais" (Characterization of Fracture and Fatigue Performance of Structural Ceramics) presented by José Jorge Lopes da Cruz Fernandes (approved in November 1994), UTL/IST.

D4) "Propriedades Mecânicas a Alta Temperatura de um Nitreto de Silício Monolítico Pre-Exposto a um Ambiente Sulfidizante" (High temperature mechanical properties of a monolithic silicon nitride pre-exposed to a sulphidizing environment) presented by Carlos Saraiva Martins (approved in June 1994), UTL/IST.

- Supervisor of 7 concluded Master's Theses:

M1) "Preliminary Structural Analysis of a Thermal Deflector of Carbon Fiber and Cork Sandwich for Space Applications" presented by Tiago André Almeida Tomás Ferreira de Barros (approved in 24 November 2014) UL/IST.

M2) "Critérios para a Identificação dos Ensaios e Equipamentos mais Utilizados na Indústria de Construção" (Criteria for selecting tests and equipment mostly applied in the characterization of building materials) presented by Vitor Alexandre Castelo Gouveia Nunes Costa (approved in 3 December 2008) UTL/IST.

M3) "Análise de ferramentas diamantadas utilizadas em corte e desbaste de mármores e granitos" (Analysis of diamond tools used in sawing and grinding of marbles and granites) presented by Carlos Alberto Gancho Anjinho (approved in 3 May 2004) UTL/IST.

M4) "Efeito da Integridade Superficial no Comportamento Mecânico do Aço AISI L6 Maquinado por Electroerosão" (Effect of surface integrity on the mechanical behaviour of AISI L6 steel machined by electro-discharge) presented by Mário Jorge Santos Araújo de Melo (approved in 1 October 1999) UTL/IST.

M5) "Influência das Condições de Anodização na Resistência à Fadiga da Liga de Alumínio 2024-T3" (Influence of anodising conditions on the fatigue strength of 2024-T3 aluminium alloy) presented by Tiago Filipe M. F. Duarte David (approved in 7 September 1999) UTL/IST.

M6) "Caracterização Mecânica e Microestrutural de Corpos densos de Carboneto de Silício obtidos por Sinterização Reactiva" (Mechanical and microstructural characterisation of silicon carbide dense bodies obtained by reaction sintering) presented by Isabel Maria Alexandrino Duarte (approved in 18 May 1998) UTL/IST.

M7) "Mecanismos de Fractura e Fadiga de Materiais Compósitos Laminados de Matriz Metálica" (Fracture and fatigue mechanisms in metal-matrix multilayer composites) presented by Maria Alexandra Sousa Rodrigues Pereira da Costa (approved in 12 April 1996)

In the period from 1992 till 2006, he supervised 31 "Trabalhos Finais de Curso" of Licenciaturas (pre-Bolonha).

- Additional experience as scientific adviser includes collaboration as Evaluator for institutions like: FCT, ANI & AdI-Agência de Inovação, ECSC Research Programm "Steel", European Science Foundation, UEFISCDI (Roménia), and CONICYT (Chile).

7. Participation in R&D projects

Participação em projectos de investigação (coordenador/membro de equipas)

- Research line: MATERIALS PROCESSING USING SOLAR FURNACES

2017:

Coordinator at IST (the contractor is IST-ID) of H2020-LCE-2016-ERA: Integrating National Research Agendas on Solar Heat for Industrial Processes (acronym: INSHIP)

Duration: 4 years, from 2017-01-01 to 2020-12-31, ongoing Project.

Further information is available at:

http://cordis.europa.eu/project/rcn/207022_en.html

<http://www.inship.eu/>

2015:

Research leader of the project "TEMP-CONTROL":

The research proposal titled "Use of high-temperature materials for improving temperature uniformity and testing conditions in indirectly-irradiated solar reactors" was selected to get access to the HSF Facility at CIEMAT-PSA within the framework of the EU-DG RTD's project: "The European Solar Research Infrastructure for Concentrated Solar Power. Second Phase: SFERA-II". This activity is regulated by the contract nº 312643 between CIEMAT-PSA and the European Commission.

2014:

Research leader of the project "INDIRECT HEATING":

The research proposal entitled "Study on improving temperature control for materials processing in solar furnaces" was selected to get access to the new Horizontal Solar Furnace at CIEMAT-PSA within the framework of the EU-DG RTD's project: "The European Solar Research Infrastructure for Concentrated Solar Power. Second Phase: SFERA-II". This activity is regulated by the contract nº 312643 between CIEMAT-PSA and the European Commission.

2014:

Coordinator at IST (the contractor is IST-ID) of Integrated Research Programme (IRP) entitled: "Scientific and Technological Alliance for Guaranteeing the European Excellence in Concentrating Solar Thermal Energy" (acronym: STAGE-STE) contract nº 609837

This IRP which was submitted to call FP7-ENERGY-2013-IRP. Starting date: February 1, 2014. Duration: 4 years. Further information is available at:

http://cordis.europa.eu/projects/rcn/111484_en.html

<http://www.stage-ste.eu/>

2013:

Research leader of the project "NH3NITRIDING":

The research proposal entitled "Study on nitriding of Fe in stream of NH₃ gas and initial trials to nitride hard metal inserts using solar radiation heating" was selected to get access to the Plataforma Solar de Almería (PSA), Spain, as "SFERA-user" of the SF-5 Facility at PSA within the framework of the EU-DG RTD's Solar Facilities for the European Research Area (SFERA) project (an activity that is regulated by the contract nº 228296 between CIEMAT-PSA and the European Commission). This research proposal (acronym: NH3NITRIDING) is a consequence of the successful solar test campaign previously carried out under the frame of SFERA project "NH3FLOW".

2011-2012:

Research leader of the project "NH3FLOW":

The research proposal entitled "Design, set-up and testing of reaction chamber for performing Solar Synthesis of IVB-VIB-groups Transition Metals Nitrides in ammonia atmospheres at PSA SF-5 facility under well controlled conditions" was selected to get access to the Plataforma Solar de Almería, Spain, within the framework of the E.U. 7th Framework Programme: Solar Facilities for the European Research Area (SFERA); contract reference number: SFERA-228296 (acronym NH3FLOW). The experimental setup that was developed (gas installation and reaction chamber) proved to be adequate for performing reaction of IV-VI-groups transition metals in ammonia atmospheres in view of obtaining the corresponding metal nitrides. The reaction chamber is based on a pyrex glass, allowing vacuum to be performed prior to each test, in order to evacuate the chamber and keep oxygen impurities at a minimum level.

2010:

Research leader of the project "SunSynt".

The research proposal entitled "Synthesis of carbides and carbo-nitrides under concentrated solar beam applying selected wave-length range by passing through colour filter" (SunSynt) was selected to get access to PROMES-CNRS solar facilities within the framework of the EU-DG RTD's Solar Facilities for the European Research Area (SFERA) project in year 2010. The aim of our experimental campaign was to look into reactions of d-group metals (Ti; V, Nb, Ta; Mo, W) with N₂ gas under solar radiation heating, i.e. the first attempt to synthesizing nitride instead of carbide of d-group transition elements. As we use graphite crucible as the sample holder, influence of C₂ radicals yielded from graphite holder was inevitable to yield carbo-nitride in place of pure nitride from the present experimental work. But, we found insertion of sky blue filter (068) led to significant suppression of carburizing reaction to yield M(C,N) with higher N content. The XRD results must be analyzed in further detail, but the acquired results appeared to be novel and worthwhile to be published.

2007:

Member of the research team of project SOLCONTROL (Investigador Responsável: Prof. J. Miranda Lemos). The research proposal entitled "Adaptive Temperature Control of a Solar Furnace" (SOLCONTROL) presented in November 2006 was selected by the Users Selection Panel of the project SOLFACE - SOLar high flux FACilities for Europe, granted by the European Community, for the access of European researchers to the PROMES-CNRS's high flux solarfacilities at Odeillo, France - to run in 2007. The objectives of this project were twofold: • To develop an adaptive controller for temperature control set-point of a solar furnace (a 6KW solar furnace at Odeillo Solar Plant) used for material testing such as thermal stress experiments. • To perform thermal stress experiments on silicon carbide (SiC) and alumina (Al₂O₃) samples by controlling, with precision, the temperature cycling on samples. Although in general solar furnaces are controlled manually, their operation requires skilled operators and imposes an extra burden on the tasks to be performed during each experiment. The use of automatic control not only allows to alleviate the operator from repetitive tasks, but also leads to more systematic procedures that result in increased performance capability for replicating experiments. Even more important, it allows innovative material treatments, impossible to carry out using conventional procedures. Furthermore, the incorporation of an adaptation mechanism dispenses prior knowledge of the thermal properties of the material to be tested for calibrating the controller.

2005-2006:

Research leader of the project SolarSYNT: "Carbide Synthesis of d-group transition metals and further studies on ceramics using the solar spectral radiation".

The research proposal entitled "Carbide Synthesis of d-group transition metals and further studies on ceramics using the solar spectral radiation" (SolarSYNT), submitted in December 2004, and selected by the Users Selection Panel of the project SOLFACE - SOLar high flux FACilities for Europe, granted by the European Community, for the access of European researchers to the PROMES-CNRS's high flux solar facilities at Odeillo, France - to run in 2005-2006.

The main objective was to carry out a series of solar-synthesis test campaigns for obtaining carbides of d-group transition metal. To look into some peculiar experimental evidences acquired during our past few years of solar carbide synthesis work at PSA, we felt it desirable to undertake supplementary experiments, e.g. reaction between tantalum (Ta) and carbon (graphite or amorphous carbon) in tap-compacted powder mixture state under solar radiation heating.

2000-2003:

Coordinator ("Investigador Responsável") of FCT POCTI/ESE/33804/99 "Construction of a Fresnel-Lens Solar Furnace for Synthesis and Sintering of Materials".

Starting date: November 2000. Conclusion date: April 2003.

The main objective was to build a small, versatile and automated solar furnace using a Fresnel lens to concentrate the energy and a special chamber where the reactions occur. This furnace was installed at the roof of one of the IST buildings.

1997-2002:

Research leader of the project entitled "Preparation of Refractory Carbides through Reaction with Non-Graphitic (Amorphous) Active Carbon".

Starting date: April 1997. Conclusion date: September 2002.

This project was initially sponsored by TMR (Training and Mobility of Researchers) and, later on, by IHP (Improving Human Potential) Programmes "Access to Research Infrastructures". The project allowed the access of our group to the solar furnace at Plataforma Solar de Almería.

1997-1999:

Coordinator at IST of INCO-COPERNICUS / THERMIE contract ICOP-DEMO-2124-1996: "High Power Density Solar Beams for Surface Modification and Synthesis of Materials for Engineering Applications" (SUNRISE). Partners: CENIM (Centro Nacional de Investigaciones Metalurgicas, Madrid, Spain), Materials Science Institute of the Scientific Association "Physics-Sun" (Tashkent, Uzbekistan) and I.S.T.

Starting date: July 1997. Conclusion date: December 31, 1999.

Summary of IST participation: The involvement of our group in this 2-year INCO-COPERNICUS research project ("demonstration project under the THERMIE programme") using the Tashkent and Parkent solar furnaces in Uzbekistan, has proved that Solar Furnaces (SF) are very promising for preparing sintered ceramic (consolidated) bodies with similar mechanical properties as those produced in conventional furnaces. In this project - for the 1st time in the world (as far as we know)- sintering of technical ceramics (Tungsten Carbide, Alumina, and LAS Glass Ceramic bodies) was performed with a SF. It was demonstrated that the densification of the initial powder compact proceeds at much higher rates, compared to those of conventional sintering in an Electric Furnace (EF). Mechanical properties (e.g. fracture toughness and hardness) of both SF and EF sintered bodies were similar.

- Research line: ORNAMENTAL AND ENGINEERED STONES (CHARACTERIZATION AND PROCESSING)

2010-2013:

Coordinator at IST of the project "LEANMACHINE: Consórcio para o desenvolvimento de máquina funcional integrada para a produção de produtos ou rochas ornamentais". Contract 2010/013304 with AGÊNCIA DE INOVAÇÃO.

Participants: ZEUGMA - Tecnologia de Sistemas Industriais, S.A. (Promotor Líder); TECNIBITE - INFORMÁTICA, S.A.; and Instituto Superior Técnico.

Starting date: 1.11.2010. Conclusion date: December 31, 2013.

2010-2012:

Coordinator at IST of E.C. "Capacities-FP7-RESEARCH FOR SMEs" Project contract FP7-SME-2010-1-262618: "Development of novel stone sawing equipment to valorise undersized and irregular stone blocks for a more rationale use of natural stone quarry resources" (XStone).

Participants:

Companies: Pedrini S.p.A. (Coordenador); Novamech S.p.A.; Pomdi - Herramientas De Diamante S.A.; Marmara Laskaridi; Cortesi Graniti S.r.l.; Marmores Galrão-Eduardo Galrão Jorge & Filhos; EUROROC - Federation de l'Industrie Marbrriere er de l'industrie Granitierre de la CEE (AISBLSA).

RTD Performers: D'Appolonia S.p.A.; INSTITUTO SUPERIOR TECNICO; National Technical University of Athens.

Starting date: 01.07.2010. Conclusion date: August 31, 2012.

2008-2011:

Coordinator at IST of E.C. "Capacities-FP7-RESEARCH FOR SMEs" Project contract FP7-SME-1-2007-222257: "Development of an automated classification system for polished stone slabs and tiles" (PROVIPS).

Participants: CNI Informatica SRL (Coordenador); Fraunhofer-Gesellschaft zur Förderung der angewandten Forschung e.V.; D'Appolonia S.p.A.; INSTITUTO SUPERIOR TECNICO; Helion GmbH; FrontWave S.A.; FURRER S.p.A.; MASERC - Mármores Sérgio Coelho, Lda; SPECIM Spectral Imaging Oy.

Starting date: 01.10.2008. Conclusion date: March 31, 2011.

2005-2008:

Coordinator at IST of E.C. 6FP "Collective Research Project"

contract COLL-CT-2005-516417: "Eco-Efficient and High Productive Stone Processing by Multifunctional Materials" (Pro-Stone).

Participants: D'Appolonia S.p.A. (Coordenador & RTD Performer); European and International Federation of Natural Stone Industries; ZDN; Associazioni Industriali di Massa Carrara; Associação Portuguesa dos Industriais de Mármores e Ramos Afins; Bulgari-Italiana Targaska, Zemedelska e Industrialna Kamara; Association of Marble Companies of Attica; Ditta Ripamonti Gianni Sas; Mincon LTD; Tesimag S.r.l.; Sodex ood Ltd; TECHMI ood; Granitos Maceira SA; Grupo GALRÃO SA; MASERC - Mármores Sérgio Coelho, Lda; Poschacher Natursteinwerke, GmbH; Zeidler&Wimmel, Steinbruch- und Steinmetzbetriebe, GmbH.; Abra Tomasz Czekaj; ECSEL S.p.A.; Megamarm LTD; Laska; Sviluppo Italia Toscana (RTD Performer); Instituto Superior Técnico (RTD Performer); Institute of Physics, Academy of Sciences of the Czech Republic (RTD Performer); National Technical University of Athens (RTD Performer).

Starting date: July 1, 2005. Finished in June 30, 2008 .

2003-2005:

Coordinator at IST of CRAFT contract G1ST-CT-2002-50271: "Machine Vision Inspection of Polished Stone" (VIPS).

RTD Performers: I.S.T., University of the West of England (Bristol) and D'Appolonia (Génova), working for the following companies: A.J. FIGUEIREDO (P), MASERC - Mármores Sérgio Coelho (P), ZUNINO MARMI (I), CNI-INFORMATICA (I) and WHITE DESIGN CO (UK).

Starting date: March 1, 2003. Finished in February 28, 2005.

2001-2004:

Coordinator at IST of GROWTH contract G1RT-CT2001-05019: "Thematic Network on Ornamental and Dimensional Stones" (OSNET) www.osnet.ntua.gr

This thematic network started its activities in June 2001 (duration: 41 months) and it was coordinated by the National Technical University of Athens (Prof. Ioannis Paspaliaris, Laboratory of Metallurgy). The other main partners (sector leaders) were: University of the West of England UWE-Bristol (UK), D'Appolonia SpA (I), CEVALOR (P), Foundation for Technical and Industrial Research at the Norwegian Institute of Technology (N), Internazionale Marmi e Macchine Carrara SpA (I), and University of Hannover (D). Special interaction was established with Dr. Sagar Midha (UWE-Bristol), Prof. Frisa Morandini (Politecnico de Torino), and the portuguese companies A.J.FIGUEIREDO (equipment manufacturer), EQUIMARMORE (diamond tool producer) and MASERC (stone processor).

1998-2002:

Coordinator at IST of PRAXIS XXI contract (Ref. 2/2.1/TPAR/2026/95) and POCTI contract (Ref: POCTI / EME / 2026 / 1995 – 2ª fase): "Evaluation of diamond tool behaviour in cutting and finishing processes of ornamental stones".

Partners: I.S.T. and CEVALOR.

Starting date: December 1, 1998. Finished in November 30, 2002.

1997-1999:
Coordinator at IST of CRAFT contract CE-BRST-CT96-5094: "Optimization of Stone Processing using Diamond Tools" (SPUD).
RTD Performers: University of the West of England (Bristol) and I.S.T., working for the following companies:
FABRIMAR (P), PIRRA (P), POMDI (E) e FEELYSTONE (IRL).
Starting date: February 1, 1997. Finished in July 1999.

- OTHER RESEARCH TOPICS:

2005-2007:

Coordinator of contract REEQ/761/CTM/2005 "NON-CONTACT EXTENSOMETRY" / "Extensometria de Não-Contacto".

Starting date: 01/01/2005. Conclude in 2007.

2001-2004:

Coordinator at IST of GROWTH contract G6RD-CT-2001-00523: "Ceramic and Carbon Fibers: Validation of Testing Methods" (VaFTeM) <http://odin.jrc.nl/ce/>

Partners:

- SNECMA: Société Nationale d'Etudes et de Construction de Moteurs d'Avions (F)
- European Commission – DG JRC – Institute for Advanced Materials (IAM) in Petten
- CEAT: Centre d'Essais Aéronautique de Toulouse (F)
- Commissariat à l' Energie Atomique (F)
- SKT - Schunk Kohlenstofftechnik GmbH (D)
- Institute of Material Physics, University of Vienna (A)
- CNRS – UMR 5801: LCTS - Laboratoire des Composites Thermostructuraux (F)
- FORTH/ICE-HT: Inst. of Chemical Engineering & High Temperatures Chem. Processes (Gr)
- INSA: Institut National des Sciences Appliquées de Lyon (F)
- NPL Management Ltd (UK)
- Instituto Superior Técnico (P)
- Ecole Nationale Supérieure des Mines de Paris – Centre des Matériaux (F)

Starting date: January 1, 2002. Finished in December 31, 2004.

1997-2000:

Member of the research team of PRAXIS XXI project no. 3/3.1/CTAE/1919/95 "Processos de anodização não-poluentes para ligas de alumínio utilizadas na industria aeronáutica" (Investigador Responsável: Prof. Mário Guerreiro da Silva Ferreira).

1996-1998:

Coordinator at IST of the project entitled: "Desenvolvimento de Tecnologias de Produção de Peças em Carboneto de Silício", under the "Programa PEDIP II" research contract no. PS/330/96/036.

Partners:

- DURIT - Metalurgia Portuguesa do Tungsténio Lda.
- INETI
- Universidade de Aveiro
- I.S.T.

Starting date: May 27, 1996. Finished in October 1998.

1990-1993:

Coordinator at IST of CECA / DG XII contract 7210/MB/932-90 "Development of New Multilayer Composites of Steel and Metallic Matrix"

Partners: CENIM (Centro Nacional de Investigaciones Metalúrgicas, Madrid, Espanha) and I.S.T.

Starting date: November 1, 1990. Finished in October 31, 1993.

1990-1994:

Coordinator at IST of BRITE-EURAM contract no. BREU-0116-C "Plasma and Laser Induced Vapour Deposition of Hermetic Coatings in Optical Fibers" (PLAID).

Partners:

- THOMSON-CSF (France)
- LABEL SA (Belgium)
- Université Libre de Bruxelles (Belgium)
- FO.R.T.H. (Greece)
- I.S.T.

Starting date: March 1, 1990. Finished in February 28, 1994.

8. Prizes and awards received

Year	Name of the prize or award	Promoting entity
2016	2016 FFEMS Top Reviewer Award for distinguished performance as a reviewer in 2014, for the journal Fatigue & Fracture of Engineering Materials & Structures	John Wiley & Sons Limited
1983	"Corrosion Fatigue Crack Growth in Medium Strength Steels" NATO Scientific Affairs Division research grant 210/82, together with Dr John C. Radon (Imperial College, London)	NATO Scientific Affairs Division
2008	Best Industrial Paper Award (co- author)	Committee of the 8th Portuguese Conference on Automatic Control
2006	S.P.M. 25 Year Medal	Sociedade Portuguesa de Materiais

9. Published works

Teses

"Fadiga de Aços-Carbono", dissertação apresentada para obtenção do grau de Doutor em Engenharia Mecânica pela Universidade Técnica de Lisboa (Instituto Superior Técnico), 1986.

Livros (autor)

L. Guerra Rosa (autor), "Desenvolvimento de novos materiais compósitos de aço e matriz metálica", EUR 16182 PT, Printed in Luxembourg, ISBN 92-828-1704-0 (1998) 131 pp.

Livros (editor)

"Global Stone Congress", LG Rosa, ZCG Silva and L Lopes (editors), total of 396 pages, Trans Tech Publications, ISBN 978-3-03785-653-6 (2013).

Advanced Materials Forum V, LG Rosa and F Margarido (editors), two soft-cover volumes (Part 1 and Part 2), total of 1600 pages, Trans Tech Publications, ISBN 978-0-87849-288-6 (2010).

Textos vários elaborados na qualidade de Consultor Técnico (para os temas dos domínios da Metalurgia, Siderurgia, Propriedades Mecânicas, Fundição e Ciência dos Materiais) da "Nova Encyclopédia LAROUSSE", edição exclusiva para a língua portuguesa, do Círculo de Leitores, Lda. e Larousse, em 22 volumes (ISBN 972-42-1476-1 obra completa) publicados entre 1996 e 1999.

Tradutor dos Capítulos 1, 10, 12 e 13 do livro de William F. Smith, "Principles of Materials Science and Engineering", 3rd ed., McGraw-Hill (1996), cuja versão em língua portuguesa "Princípios de Ciência e Engenharia de Materiais" (ISBN 972-8298-68-4) foi editada em 1998.

Textos vários elaborados na qualidade de Consultor Técnico (para os temas dos domínios da Metalurgia, Siderurgia, Propriedades Mecânicas, Fundição e Ciência dos Materiais) da "Nova Encyclopédia LAROUSSE", edição exclusiva para a língua portuguesa, do Círculo de Leitores, Lda. e Larousse, em 22 volumes (ISBN 972-42-1476-1 obra completa) publicados entre 1996 e 1999.

MATERIAIS 97, Guerra Rosa L (editor), Anais do 8º Encontro Nacional da Sociedade Portuguesa de Materiais, realizado na Marinha Grande, de 11 a 13 de Junho de 1997, Volume 1 (353 pp.), Volume 2 (357 pp.) & Suplemento (69 pp.).

MATERIAIS 91, Pádua Loureiro A, Guerra Rosa L, Rosa M E e Oliveira M M (editores), Actas do V Encontro Nacional da Sociedade Portuguesa de Materiais CEMUL/S.P.M., Lisboa (1991), em 2 volumes, 747 pp.

"Surface Engineering with High Energy Beams", Pádua Loureiro A, Conde O, Guerra Rosa L and Vilar R (editors), Proceedings of 2nd IFHT Seminar, Lisbon, September 1989, published by Trans Tech Publications, prev. publ. in Key Eng. Materials, ISBN 0-87849-607-6 (1990) 610 pp.

"Advances in Fatigue Science and Technology", Moura Branco C and Guerra Rosa L (editors), NATO ASI Series E 159, Kluwer Academic Publishers, ISBN 0-7923-0105-6 (1989) 976 pp.

Artigos em revistas de circulação internacional com arbitragem científica

- Research line: MATERIALS PROCESSING USING SOLAR FURNACES

Title: Low-temperature short-time nitriding of Va-group metals, V, Nb and Ta, in uncracked NH₃ gas under heating with concentrated solar power (CSP)

Author(s): Fernandes JC, Oliveira FAC, Rosa LG, Rodriguez J, Cañadas I, Magalhães T, Shohoji N

Source: Ciência & Tecnologia dos Materiais Volume: 28, Issue:2 Pages: 112-116 Published: 2016

Title: Temperature uniformity improvement in a solar furnace by indirect heating

Author(s): Oliveira FAC, Fernandes JC, Rodriguez J, Cañadas I, Galindo J, Rosa LG

Source: Solar Energy Volume: 140 Pages: 141-150 Published: 2016

DOI: 10.1016/j.solener.2016.11.004

Title: Reactions of IVa-group metals, Ti and Zr, with uncracked NH₃ gas at a temperature in the range between 600 and 800°C under heating with concentrated solar beam at PSA

Author(s): Oliveira FAC, Figueira Vasques I, Fernandes JC, Cañadas I, Rodriguez J, Rosa LG, Shohoji N

Source: Solar Energy Volume: 138 Pages: 119-127 Published: 2016

DOI: 10.1016/j.solener.2016.09.012

Title: Structural Integrity Assessment of Glass Components in Concentrated Solar Power (CSP) Systems

Author(s): Rosa LG, Fernandes JC, Li B

Source: Theoretical and Applied Fracture Mechanics Volume: 80 Pages: 14-21 Published: 2015

DOI: 10.1016/j.tafmec.2015.09.002

Title: Numerical and experimental study on improving temperature uniformity of solar furnaces for materials processing

Author(s): Li B, Oliveira FAC, Rodriguez J, Fernandes JC, Rosa LG

Source: Solar Energy Volume: 115 Pages: 95-108 Published: 2015

DOI: 10.1016/j.solener.2015.02.023

Title: Nitriding VI-group metals (Cr, Mo and W) in stream of NH₃ gas under concentrated solar irradiation in a solar furnace at PSA (Plataforma Solar de Almería)

Authors: Oliveira FAC, Rosa LG, Fernandes JC, Rodriguez J, Cañadas I, Magalhães T, Shohoji N

Source: Solar Energy Volume: 114 Pages: 51-60 Published: 2015

DOI: 10.1016/j.solener.2015.01.028

Title: Integrated assessment procedure for determining the fracture strength of glass components in CSP systems

Author(s): Rosa LG, Fernandes JC, Li B

Source: Frattura ed Integrità Strutturale Issue: 30 Pages: 438-445 Published: 2014

DOI: 10.3221/IGF-ESIS.30.53

Title: Synthesizing Higher Nitride of Molybdenum (Mo) and Iron (Fe) in Ammonia (NH₃) Gas Stream under Irradiation of Concentrated Solar Beam in a Solar Furnace at Plataforma Solar de Almería (PSA)

Author(s): Shohoji N, Oliveira FAC, Fernandes JC, Rosa LG, Rodriguez J, Cañadas I, Ramos C, Magalhães T, Cestari F

Source: Materialwissenschaft und Werkstofftechnik Volume: 44 Issue: 12 Pages: 959-971 Published: 2013

DOI: 10.1002/mawe.201300163

Title: Synthesising Carbo-Nitrides of Some d-Group Transition Metals Using a Solar Furnace at PSA

Author(s): Shohoji N, Oliveira FAC, Rosa LG, Fernandes JC, Magalhães T, Coelho MBC, Rodriguez J, Cañadas I, Ramos C, Martinez D

Source: Materials Science Forum Volume: 730-732 Pages: 153-158 Published: 2013

DOI: 10.4028/www.scientific.net/MSF.730-732.15

Title: Crystal Grain Morphology Evolution over Ti, V, Nb and Ta Surface Heated in N₂ Gas Environment to 2000°C by Filtered Concentrated Solar Beam in a Solar Furnace at PROMES-CNRS

Author(s): Oliveira FAC, Rosa LG, Peraudeau G, Granier B, Fernandes JC, Magalhães T, Shohoji N

Source: Materials Transactions Volume: 53 Issue: 3 Pages: 537-545 Published: 2012

DOI: 10.2320/matertrans.M2011299

Title: Influence of Colour Filter on Reaction Products from Mo and W Heated to 2000°C by Concentrated Solar Beam in N₂ Gas Environment in a Solar Furnace at PROMES-CNRS

Author(s): Peraudeau G, Oliveira FAC, Rosa LG, Granier B, Fernandes JC, Magalhães T, Shohoji N

Source: Materials Transactions Volume: 52 Issue: 11 Pages: 2083-2090 Published: 2011

DOI: 10.2320/matertrans.M2011019

Title: Temperature control of a solar furnace for material testing
Author(s): Andrade Costa B, Lemos JM, Rosa LG
Source: International Journal of Systems Science Volume: 42 Issue: 8 Pages: 1253-1264 Published: 2011
DOI: 10.1080/00207721.2011.588894

Title: Reactions of Ti, V, Nb and Ta with N₂ Gas at 2000°C under Concentrated Solar Beam in a Solar Furnace at PROMES-CNRS
Author(s): Shohoji N, Oliveira FAC, Rosa LG, Peraudeau G, Granier B, Magalhães T, Fernandes JC
Source: Materials Transactions Volume: 52 Issue: 4 Pages: 719-727 Published: 2011
DOI: 10.2320/matertrans.M2010314

Title: Heterogeneity along the Height in Disc Specimens of Graphite/Tungsten Powder Mixtures with Sub-Stoichiometric Carbon Atom Ratios Heated by Concentrated Solar Beam to 1600°C
Author(s): Shohoji N, Magalhaes T, Oliveira FAC, Rosa LG, Fernandes JC, Rodriguez J, Canadas I, Martinez D
Source: Materials Transactions Volume: 51 Issue: 2 Pages: 381-388 Published: 2010
DOI: 10.2320/matertrans.M2009313

Title: Carbide Phases Synthesised from C/Mo Powder Compacts at Specified Sub-Stoichiometric Ratios by Solar Radiation Heating to Temperatures between 1600°C and 2500°C
Author(s): Granier B, Shohoji N, Oliveira FAC, Magalhães T, Fernandes JC, Rosa LG
Source: Materials Transactions Volume: 50 Issue: 12 Pages: 2813-2819 Published: 2009
DOI: 10.2320/matertrans.M2009167

Title: Mechanical Properties of Dense Cordierite Discs Sintered by Solar Radiation Heating
Author(s): Oliveira FAC, Rosa LG, Fernandes JC, Rodríguez J, Cañadas I, Martínez D, Shohoji N
Source: Materials Transactions Volume: 50 Issue: 9 Pages: 2221-2228 Published: 2009
DOI: 10.2320/matertrans.MRA2008369

Title: Carbide Synthesis from Graphite/molybdenum Powder Mixtures at Sub-Stoichiometric Ratios under Solar Radiation Heating to 1900°C
Author(s): Granier B, Badie JM, Oliveira FAC, Magalhães T, Shohoji N, Rosa LG, Fernandes JC
Source: Materials Transactions Volume: 49 Issue: 11 Pages: 2673-2678 Published: 2008
DOI: 10.2320/matertrans.MRA2008202

Title: Surface Singularity upon Solar Radiation Heating of Graphite/Tungsten Powder Mixture Compacts to Temperatures in Excess of 1600°C
Author(s): Oliveira FAC, Granier B, Badie JM, Fernandes JC, Rosa LG, Shohoji N
Source: Advanced Materials Forum IV Volume: 587-588 Pages: 993-997 Published: 2008
DOI: 10.4028/www.scientific.net/MSF.587-588.993

Title: Formation of hexagonal eta-MoC_{1-x} phase at a temperature lower than 1660°C by solar radiation heating under presence of excess free carbon
Author(s): Shohoji N, Badie JM, Granier B, Oliveira FAC, Fernandes JC, Rosa LG
Source: International Journal of Refractory Metals & Hard Materials Volume: 25 Issue: 3 Pages: 220-225 Published: 2007
DOI: 10.1016/j.ijrmhm.2006.05.004

Title: High meta-stability of tungsten sub-carbide W₂C formed from tungsten/carbon powder mixture during eruptive heating in a solar furnace
Author(s): Oliveira FAC, Fernandes JC, Badie JM, Granier B, Rosa LG, Shohoji N
Source: International Journal of Refractory Metals & Hard Materials Volume: 25 Issue: 1 Pages: 101-106 Published: 2007
DOI: 10.1016/j.ijrmhm.2006.03.001

Title: Nano-meter size WC whiskers grown over a compacted pellet of graphite/tungsten powder mixture heated with an ultra-fast heating rate by a concentrated solar beam
Author(s): Dias S, Oliveira FAC, Granier B, Badie JM, Fernandes JC, Guerra Rosa L, Shohoji N
Source: Materials Transactions Volume: 48 Issue: 5 Pages: 919-923 Published: 2007
DOI: 10.2320/matertrans.48.919

Title: Synthesis of tungsten sub-carbide W₂C from graphite/tungsten powder mixtures by eruptive heating in a solar furnace
Author(s): Oliveira FAC, Granier B, Badie J-M, Fernandes JC, Guerra Rosa L, Shohoji N
Source: International Journal of Refractory Metals & Hard Materials Volume: 25 Issue: 4 Pages: 351-357 Published: 2007
DOI: 10.1016/j.ijrmhm.2006.10.002

Title: Kinetic aspects of reaction between tantalum and carbon material (active carbon or graphite) under solar radiation heating
 Author(s): Fernandes JC, Oliveira FAC, Granier B, Badie JM, Rosa LG, Shohoji N
 Source: Solar Energy Volume: 80 Issue: 12 Pages: 1553-1560 Published: 2006
 DOI: 10.1016/j.solener.2006.01.001

Title: Solar sintering of cordierite-based ceramics at low temperatures
 Author(s): Oliveira FAC, Shohoji N, Fernandes JC, Rosa LG
 Source: Solar Energy Volume: 78 Issue: 3 Pages: 351-361 Published: 2005
 DOI: 10.1016/j.solener.2004.08.013

Title: Characterisation of solar-synthesised TiCx ($x=0.50, 0.625, 0.75, 0.85, 0.90$ and 1.0) by X-ray diffraction, density and Vickers microhardness
 Author(s): Fernandes JC, Anjinho C, Amaral PM, Rosa LG, Rodriguez J, Martinez D, Oliveira FAC, Shohoji N
 Source: Materials Chemistry and Physics Volume: 77 Issue: 3 Pages: 711-718 Published: 2003
 DOI: 10.1016/S0254-0584(02)00131-1

Title: Fracture toughness of solar-sintered WC with Co additive
 Author(s): Rosa LG, Amaral PM, Anjinho C, Fernandes JC, Shohoji N
 Source: Ceramics International Volume: 28 Issue: 3 Pages: 345-348 Published: 2002
 DOI: 10.1016/S0272-8842(01)00099-2

Title: Photochemical effects in carbide synthesis of d-group transition metals (Ti, Zr; V, Nb, Ta; Cr, Mo, W) in a solar furnace at PSA (Plataforma Solar de Almeria)
 Author(s): Rodriguez J, Martinez D, Rosa LG, Fernandes JC, Amaral PM, Shohoji N
 Source: Journal of Solar Energy Engineering-Transactions of the Asme Volume: 123 Issue: 2 Pages: 109-116 Published: 2001
 DOI: 10.1115/1.1350565

Title: Carbide formation of Va-group metals (V, Nb and Ta) in a solar furnace
 Author(s): Amaral PM, Fernandes JC, Rosa LG, Martinez D, Rodriguez J, Shohoji N
 Source: International Journal of Refractory Metals & Hard Materials Volume: 18 Issue: 1 Pages: 47-53 Published: 2000
 DOI: 10.1016/S0263-4368(00)00014-7

Title: Catalytic graphitisation of amorphous carbon during solar carbide synthesis of VIa group metals (Cr, Mo and W)
 Author(s): Shohoji N, Amaral PM, Fernandes JC, Rosa LG, Martinez D, Rodriguez J
 Source: Materials Transactions Jim Volume: 41 Issue: 1 Pages: 246-249 Published: 2000
 URL: <http://www.jim.or.jp/journal/e/pdf3/41/01/246.pdf>

Title: Weibull statistical analysis of flexure breaking performance for alumina ceramic disks sintered by solar radiation heating
 Author(s): Fernandes JC, Amaral PM, Rosa LG, Shohoji N
 Source: Ceramics International Volume: 26 Issue: 2 Pages: 203-206 Published: 2000
 DOI: 10.1016/S0272-8842(99)00041-3

Title: Catalytic acceleration of graphitisation of amorphous carbon during synthesis of tungsten carbide from tungsten and excess amorphous carbon in a solar furnace
 Author(s): Shohoji N, Rosa LG, Fernandes JC, Martinez D, Rodriguez J
 Source: Materials Chemistry and Physics Volume: 58 Issue: 2 Pages: 172-176 Published: 1999
 DOI: 10.1016/S0254-0584(98)00275-2

Title: Influence of gas environment on synthesis of silicon carbide and some carbides and carbonitrides of d-group transition metals through reaction between metal powders and amorphous carbon powders in a solar furnace at PSA (Plataforma Solar de Almeria)
 Author(s): Martinez D, Rodriguez J, Rosa LG, Fernandes JC, Shohoji N
 Source: Journal De Physique Iv Volume: 9 Issue: P3 Pages: 405-410 Published: 1999
 DOI: 10.1051/jp4:1999363

Title: Photochemically promoted formation of higher carbide of molybdenum through reaction between metallic molybdenum powders and graphite powders in a solar furnace
 Author(s): Rosa LG, Fernandes JC, Amaral PM, Martinez D, Rodriguez J, Shohoji N
 Source: International Journal of Refractory Metals & Hard Materials Volume: 17 Issue: 5 Pages: 351-356 Published: 1999
 DOI: 10.1016/S0263-4368(99)00020-7

Title: X-ray diffraction characterisation of carbide and carbonitride of Ti and Zr prepared through reaction between metal powders and carbon powders (graphitic or amorphous) in a solar furnace
Author(s): Fernandes JC, Amaral PM, Rosa LG, Martinez D, Rodriguez J, Shohoji N
Source: International Journal of Refractory Metals & Hard Materials Volume: 17 Issue: 6 Pages: 437-443
Published: 1999
DOI: 10.1016/S0263-4368(99)00036-0

Title: Influence of gas environment on synthesis of silicon carbide through reaction between silicon and amorphous carbon in a solar furnace at PSA (Plataforma Solar de Almeria)
Author(s): Fernandes, JC; Rosa, LG; Martinez, D; et al.
Source: Journal of the Ceramic Society of Japan Volume: 106 Issue: 8 Pages: 839-841 Published: 1998

 A análise da assinatura na qualidade do corte de rochas ornamentais
 Proc. International Congress on Natural Stone – Environment and Quality, Lisbon, 16-17 May 2001, 5 pp.
- Amaral P, Fernandes JC, Guerra Rosa L, Morandini AF, Manfredotti L, Marini P
 Evaluation of the workability by means of diamond tools of a series of portuguese commercial granites
 Convegno su "Le cave di Pietre Ornamentali", 28-29 Novembre 2000, edited by GEAM Associazione Georisorse e Ambiente, Politecnico di Torino (2000) pp. 323-329.
- Guerra Rosa L, Amaral PM, Anjinho CA, Fernandes JC, Antunes SD, Antunes J
 Ornamental Stone Processing – New Methodologies for the Characterisation of Petreous Materials and Diamond Tool Behaviour
 Actas II Congresso Internacional da Pedra Natural, Vila Viçosa, 5 a 7 de Outubro 2000, ed. C. M. Vila Viçosa (2000) 7 pp.
- Antunes SD, Antunes J, Guerra Rosa L, Anjinho CA, Amaral PM, Fernandes JC
 A Monitoring System to Study and Optimise Machinery used for the Ornamental Stone Processing
 Actas II Congresso Internacional da Pedra Natural, Vila Viçosa, 5 a 7 de Outubro de 2000, ed. C. M. Vila Viçosa (2000) 6 pp.
- Midha PS, Guerra Rosa L, Amaral PM, Fernandes JC, Channon RD, Montakhab MR, Leal F, Pozo D, Pereira JP, Batalha JZ
 Ornamental-Stone Processing using Diamond Tools: An Investigation into Tool Performance and the Economic & Environmental Benefits
 Proc. EUROTEN 2000 Workshop - European Commission - Industrial and Materials Technologies Programme, Lisbon, 19-21 January 2000 (Edited by I. Paspaliaris et al.), EUR 19370 (2000) pp. 311-318.
- Midha PS, Guerra Rosa L, Amaral PM, Fernandes JC, Channon RD, Montakhab MR, Leal F, Pozo D, Pereira JP
 Ornamental Stones: Slab and Edge Polishing using Diamond Tools - Research Results and Technological Achievements
 Proc. EUROTEN'99 Workshop - European Commission - Industrial and Materials Technologies Programme, Cagliari, 18-20 January 1999, Edited by I. Paspaliaris et al., EUR 18915 (1999) pp. 317-327.
- Fernandes JC, Amaral PM, Guerra Rosa L, Leal F
 A New Method for Testing Diamond Tools
 Proc. Int. Workshop on Diamond Tool Production, EURO PM 99, (Edited by EPMA, European Powder Metallurgy Association) (1999) pp.169-176.
- Amaral PM, Fernandes JC, Guerra Rosa L
 Classificação de Rochas Ornamentais Segundo a sua Abrasividade em Operações de Desbaste
 Proc. MATERIAIS'99, 9º Encontro da Sociedade Portuguesa de Materiais, ISBN 972-98193-0-0 (1999) Vol. 1, pp. 317-322.
- Guerra Rosa L, Fernandes JC, Amaral PM, Maurício P
 Análise Sobre a Correlação entre a Abrasividade de Granitos e suas Propriedades Macro-Mecânicas
 Proc. MATERIAIS'99, 9º Encontro da Sociedade Portuguesa de Materiais, ISBN 972-98193-0-0 (1999) Vol. 1, 323-328.
- Guerra Rosa L, Fernandes JC, Amaral PM
 A Method for Classification of Stone Materials according to their Abrasiveness
 Proc. EUROTEN'98 Workshop - European Commission - Industrial and Materials Technologies Programme, Athens, 12-14 January 1998, edited by A. Kontopoulos et al., EUR 18310 (1998) pp. 338-345.

- OTHER RESEARCH TOPICS:

Guerra Rosa L and Figueiredo I

Strength of Brittle Materials based on Mixture of two Weibull Distributions

Proc. 9th MESOMECHANICS Conference: Particle & continuum aspects of mesomechanics, Giens, France, 13-17 May 2007 (edited by G. C. Sih, M. Nait-Abdelaziz and T. Vu-Khanh), ISBN 13: 978-1-84704-025-1, pp 415-428.

Oliveira FAC, Páscoa J, Melo M, Fernandes JC, Guerra Rosa L, Sacramento J, Valente MA

Mechanical Failure Mechanisms in a Micrograined WC-Co Hardmetal

Proc. 9th Portuguese Conference on Fracture, Sociedade Portuguesa de Materiais, E.S.T. Setúbal, 18-20 February 2004, 10 pp.

David T, Guerra Rosa L, Fernandes JCS, Ferreira MGS

Influência das Condições de Anodização na Resistência à Fadiga da Liga de Alumínio 2024-T3

Proc. MATERIAIS'99, 9º Encontro da Sociedade Portuguesa de Materiais, ISBN 972-98193-0-0 (1999) Vol. 2, 79-82.

Guerra Rosa L, Fernandes JC, Duarte IA

Subcritical Crack Growth in Three Engineering Ceramics under Biaxial Conditions

Proc. 12th European Conference on Fracture, ECF 12: FRACTURE FROM DEFECTS (editors M.W. Brown, E.R. de los Rios, K.J. Miller), E.M.A.S. (U.K.), ISBN 1-901537-03-X (1998) Vol.I, pp. 509-514.

Guerra Rosa L, Fernandes JC

Measurements of Fracture Toughness in a Micrograined Tungsten Carbide using two Different Methods

Proc. 1998 Powder Metallurgy World Congress & Exhibition, Granada, 18-22 October 1998, edited by EPMA: European Powder Metallurgy Association (1998) Vol. 4, pp. 2-7.

Rodrigues PA, Guerra Rosa L, Steen M

Fatigue Behaviour of a Ceramic Matrix Composite (CMC), 2D Cfibre/SiCmatrix

Proc. HT-CMC-2 Second International Conference on High Temperature Composite Materials, Santa Barbara, California (1995) in "High-Temperature Ceramic-Matrix Composites I: Design Durability and Performance", ISBN 094490498X (Eds: AG Evans, R. Naslain), Ceramic Transactions, Vol. 57 (1995), pp. 351-356.

Oliveira FAC, Fernandes JJ, Paiáguia P, Guerra Rosa L

The Influence of the Forming Methods on the Flexural Strength of a Porous Cordierite-based Ceramic

Proc. Fourth Euro-Ceramics, Faenza Editrice S.p.A., Vol.1, (edited by C. Galassi), ISBN 88-8138-005-6 (1995) pp. 389-396.

Duarte IA, Fernandes JJ, Guerra Rosa L, Silva CP

Influence of Water Content on the Properties of Three Different Plasters of Paris

Proc. Fourth Euro-Ceramics, Faenza Editrice S.p.A., Vol.10, (edited by P. Gambara, G. Pasquali, M. Biadigo), ISBN 88-8138-014-5 (1995) pp. 41-48.

Fernandes JJ, Guerra Rosa L, Morrell R

Fracture Toughness using a Biaxial Indentation Strength Method

Proc. Third Euro-Ceramics (editors P. Durán and J.F. Fernández), Faenza Editrice Ibérica S.L., (1993) Vol.3, pp 907-911.

Fernandes JJ, Silva CP, Guerra Rosa L

HIP treatment of WC(<1μm) - 4w%Co

Proc. Hot Isostatic Pressing '93, (editors L. Delaey and H. Tas), @Elsevier Science B.V., ISBN 0-444-89959-6 (1994) pp.283-290.

Martins CS, Steen M, Bressers J, Guerra Rosa L

Characterization of the Flexural Strength Degradation of a Commercial Hot-Pressed Silicon Nitride in a High-Temperature Sulphidizing Environment

International Symp. on Fracture Mechanics of Ceramic Materials, Nagoya, Japan, Jul 15-17, 1991; published in Fracture Mechanics of Ceramics, Vol 10 - Fracture Fundamentals, High-Temperature Deformation, Damage, and Design (Editors: Bradt RC, Hasselman DPH, Munz D, Sakai M, Shevchenko VY), ISBN 0-306-44203-5 (1992) pp.379-390.

Martins CS, Steen M, Bressers J, Guerra Rosa L

High Temperature Flexural Strength Degradation of HP-Si₃N₄ Pre-Exposed to Sulphidizing Aggressive Environments

Proc. ECERS 2, 2nd European Ceramic Society Conference, Augsburg, Germany, 11-14 September 1991, (edited by G. Ziegler and H. Hausner), Deutsche Keramische Gesellschaft e.V., (1992).

Fernandes JJ, Guerra Rosa L, Silva CP
 Kc from Fractography of Al2O3 and Al2O3/ZrO₂
 Proc. ECERS 2, 2nd European Ceramic Society Conference, Augsburg, Germany, 11-14 September 1991,
 (edited by G. Ziegler and H. Hausner), Deutsche Keramische Gesellschaft e.V., (1992) Vol.2, pp.1231-1235.

Radon JC, Guerra Rosa L
 A Model for Ultra-Low Fatigue Crack Growth
 Proc. FATIGUE 87, editors R.O. Ritchie and E.A. Starke, E.M.A.S. (U.K.), ISBN 0-94787-23-9 (1987), Vol.II,
 pp.851-859.

Guerra Rosa L, Branco CM, Radon JC
 Prediction of Thresholds using Cyclic Properties of Materials
 Proc. of the 6th European Conference on Fracture – ECF 6, editors H.C. van Elst and A. Bakker, E.M.A.S.
 (U.K.), ISBN 0-947817-18-2 (1986), Vol.II, pp.1321-1332.

Guerra Rosa L, Faria LO
 A case study: Fracture of jib bearing screws in a travelling crane
 Proc. of the 5th European Conference on Fracture, editor L. Faria, E.M.A.S. (U.K.), ISBN 0-077817-06-9 (1985)
 Vol.II, pp.541-552.

Branco CM, Guerra Rosa L, Radon JC
 Influence of strain-rate and strain cycling on fatigue crack-tip plasticity
 Proc. of the 5th European Conference on Fracture, editor L. Faria, E.M.A.S. (U.K.), ISBN 0-077817-06-9 (1985)
 Vol.I, pp.317-327.

Guerra Rosa L, Branco CM, Radon JC
 Influence of Plastic Zone Size on Closure Phenomenon at Fatigue Threshold in Steels
 Proc. FATIGUE 84, editor C.J. Beevers, E.M.A.S. (U.K.), ISBN 0-950620-8-X (1984) Vol.I, pp.231-241.

Guerra Rosa L, Branco CM
 Influence of Plastic Zone Size on Fatigue Threshold in Steels
 Proc. Int. Conference on "Fracture Prevention in Energy and Transport Systems", editors I. Le May and S.N.
 Monteiro, E.M.A.S. (U.K.), ISBN 0-947817-02-6 (1984) Vol.I, pp.24-33.

Guerra Rosa L, Branco CM, Radon JC
 Effects of Plasticity and Strain-Rate on Fatigue Crack Growth
 Proc. of the 4th European Conference on Fracture, editors K.L. Maurer and F.E. Matzer, E.M.A.S. (U.K.), ISBN
 0-9506820-5-5 (1982) Vol.II, pp.449-456.
